How to Update MacOS and Other Applications

How to update Mac-OS, Safari, Messages, Mail, Music, Photos, FaceTime, and Calendar.

- Click the apple menu icon on the top left corner of the screen.

- Click on system preferences.

- In the new window, click on Software Update.

- If an update is available, click on upgrade now.

- Click Agree.

- Allow the program to download. **Make sure any important documents are saved and closed during this process.**

- Once the download is complete, the computer will restart to complete the download.
- After some loading, you will need to login back onto your computer. Your OS will be updated, along with the stated applications.
