

Fix CSS Loading Issue (Page looks Scrambled)

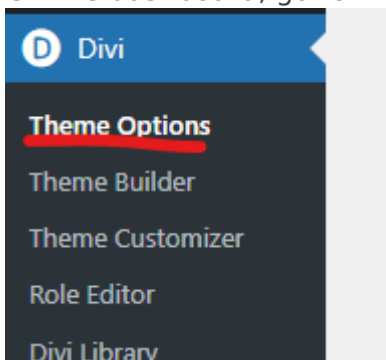

When we edit certain things on the site, certain cache needs refreshed. If your page looks like this:

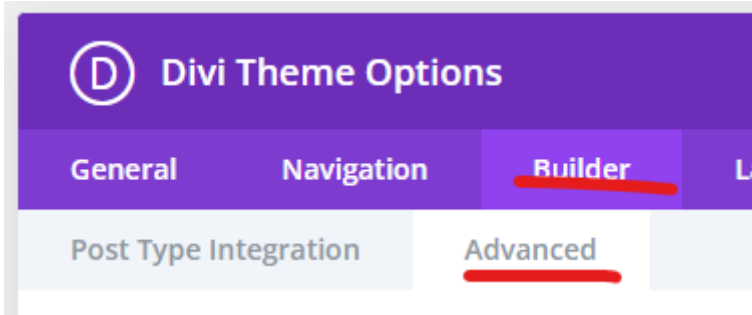

Here is how to fix it.

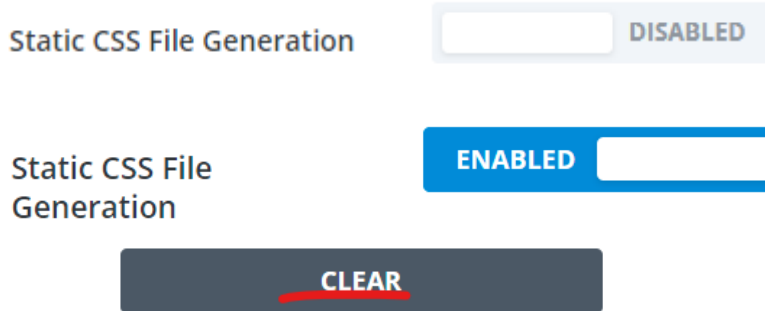

1. On the dashboard, go to Divi and Theme Options

2. Then Builder>Advanced

3. Enable CSS File Generation and click the Clear Button

4. **DISABLE STATIC CSS File Generation after you've cleared it.**

5. Then hit save changes
